WORKING TOGETHER FOR A BRIGHTER FUTURE

WHY SCOTTISH RENEWABLES?

Scottish Renewables is the voice of Scotland's renewable energy industry. Our vision is for a Scotland leading the world in renewable energy.

We work to grow Scotland's renewable energy sector and sustain its position at the forefront of the global clean energy industry.

The industry we represent delivers investment, jobs, social benefits and reduces the carbon emissions which cause climate change.

Our members work across all renewable energy technologies, in Scotland, the UK, Europe and around the world.

We work closely with our members and key stakeholders to:

- **Lead thinking on the main opportunities and challenges for the sector**
- **Encourage the optimum conditions for the growth of renewables**
- **Ensure policy makers and stakeholders are well informed about renewable energy in our society, economy and environment.**

We invite you to join our business network and make your voice heard through the work that the team at Scottish Renewables does on behalf of our members. This work spans the full range of renewable technologies, sectors and cross-cutting regulatory issues, including:
